

3<sup>rd</sup> March 2021

Dear Dr Ramsay,

The following member organisations of the United Kingdom Critical Care Nursing Alliance (UKCCNA) are delighted to share their support for the Critical Care Recovery COVID-19 website:

- British Association of Critical Care Nurses (BACCN)
- National Outreach Forum (NoF)
- Intensive Care Society (Nurse Professional Advisory Group)
- Critical Care National Network Lead Nurse Forum (CC3N)

We believe the Critical Care Recovery COVID-19 (and the critical care recovery website developed before the pandemic) to be an invaluable resource, and one that we are proud to signpost to. The website centres the patient experience at its heart and has been developed using robust qualitative research with patients, co-produced with them and with input from frontline multi professional staff during the pandemic. This resource is hugely important in supporting people who have been critically ill due to COVID-19 on their journey to rehabilitation and recovery.

Your sincerely

Professor Suzanne Bench

Chair: UKCCNA
